NtGC 2010 - Instructions for Proceedings

Proceedings of the conference *"Non-thermal phenomena in colliding galaxy clusters"* (Nice, 15-18 November 2010) are preliminarily accepted for publication on the Memorie della Società Astronomica Italiana. The slot for the publication is Vol. 82 n.3.

Maximum number of pages allowed for each proceeding:

- 8 pages for review talks;
- 6 pages for invited talks;
- 4 pages for contributed talks;
- 2 pages for posters.

The articles must be prepared using LateX2e, using the document class mem.cls, available from the web site of the Memorie (http://sait.oats.inaf.it), figures must be provided as postscript or encapsulated postscript files, as detailed in the instructions for authors (http://sait.oats.inaf.it/instructions.htm).

The article .tex file together with the .ps or .eps figure files have to be sent to chiara.ferrari@oca.eu. Please specify in the subject "NtGC 2010 - Proceeding". The strict deadline for submitting proposals is January 23, 2011.

For anything, concerning style, which is not explicitly written in our instructions for authors, Memorie conforms to the style of A&A. (http://www.aanda.org/images/stories/doc/aaguide2006-beta.pdf).

Please note that from 2004 txfonts re used. The authors may use them in the preparation of their manuscript by simply putting the statement \usepackage{txfonts} in the preamble of their paper. If they do not this will be taken care of, by the editorial staff. Since txfonts are more compressed than computer modern fonts a longer text may be accomodated in the same number of pages.

I draw your attention to the use of the natbib.sty package for the references (aa.bst bibliography style) and correct use of the macros \citet,\citep etc.. as detailed in the manual natnotes.ps available at ftp.edpsciences.org/pub/aa/readme.html. Use of these macros is essential to allow us to correctly create the related hyperlinks.
